CORPORATE

STRONG – DEPENDABLE – PROFESSIONAL

Modu-Loc's commitment is simple – backed by an outstanding team, we provide attractive, quality site containment solutions to keep our customers and their sites safe and protected.

With multiple locations across Canada providing nationwide coverage, we have been servicing our customers in **special events, construction, retail and the municipal sector** since 1996. With over 3 million feet of fence in inventory, Modu-Loc is well-equipped to handle events of all sizes - from small, local festivals to significant, large-scale special events.

Organizations such as the RCMP and CSIS have trusted Modu-Loc fence products to provide security at high-profile events, including the Vancouver Olympic Games, G20 Summit, APEC Conference and President's Cup. Modu-Loc products also were used to secure more than 60 sites for the TORONTO 2015 Pan Am / Parapan Am Games.

ORGANIZATIONS WE SUPPORT

Modu-Loc is a proud partner of **Habitat for Humanity Canada** and **Threads of Life**. Partnering with these organizations is one way we demonstrate our core values of Family & Well-being and Safety & Accountability.

OUTSTANDING CUSTOMER SERVICE

All things considered, our customer service is what truly differentiates Modu-Loc from the competition. Our delivery and installation crews - known as **Modu-Loc 'Field Specialists'** - are trained professionals who understand the security, accessibility and image requirements of our customers. We provide emergency response, a quality product, and expert recommendations concerning fence placement and crowd control.

BUILDING A PARTNERSHIP

No matter the project, our approach is always to work closely with our clients to identify site requirements and ensure that all criteria are met. For us, success lies in delivering peace of mind to our customers.

At Modu-Loc Fence Rentals we are known for the strength and durability of our fencing products, and the unparalleled service and expertise we provide to our customers. **Call 1.800.522.8371** to be directed to the nearest regional office.

OUR CORE VALUES

At Modu-Loc, our core values serve as the code of conduct observed by every one of our employees. The core values help to ensure that our customers receive the very best service in the industry.

EVENT EXPERTS

THE MODU-LOC FENCE SYSTEM

The **Modu-Loc fence system** meets and exceeds the requirements for site safety and security. Our signature green fence panels are 10 feet in length and available in heights of 4, 6, and 8 feet. Modu-Loc rental panels are professionally engineered for strength and durability to provide the highest degree of security in the rental fence industry.

The fence panel's frame consists of structural steel square tubing and the interior panel design incorporates heavy gauge welded wire mesh. Our superior components - including longer caps, bases, and base extensions - work together to ensure optimal fence line integrity.

Modu-Loc is the **industry leader in innovation**. We have developed a number of leading-edge products to complement our fencing systems. Our continued focus on innovation ensures that we are able to proactively address the needs of our customers.

Modu-Loc Fence Rentals is the leader in crowd control for the special events industry. The Modu-Loc system ensures security, privacy and visual appeal to meet the needs of any type or size of event. Modu-Loc's experienced delivery and installation specialists have an in-depth understanding of the complexities and demands of event production, enabling them to provide recommendations for optimum crowd control and security.

SECURITY – secure Modu-Loc fence panels with breach-deterrent systems like security clamps and anti-climb rails

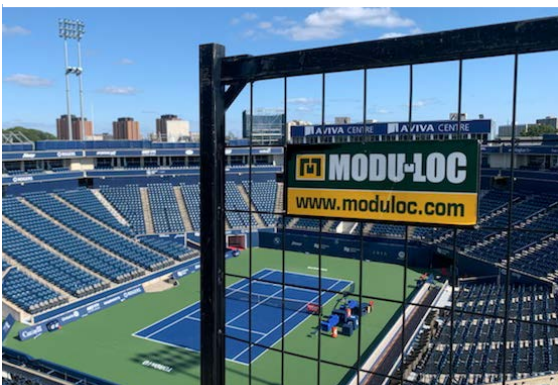

SERVICE – flexible schedules to provide on-site assistance and meet the logistical demands of the event industry

SUPERIOR INSTALLATION SYSTEMS – solutions for windy conditions, uneven terrain, high security and restricted access

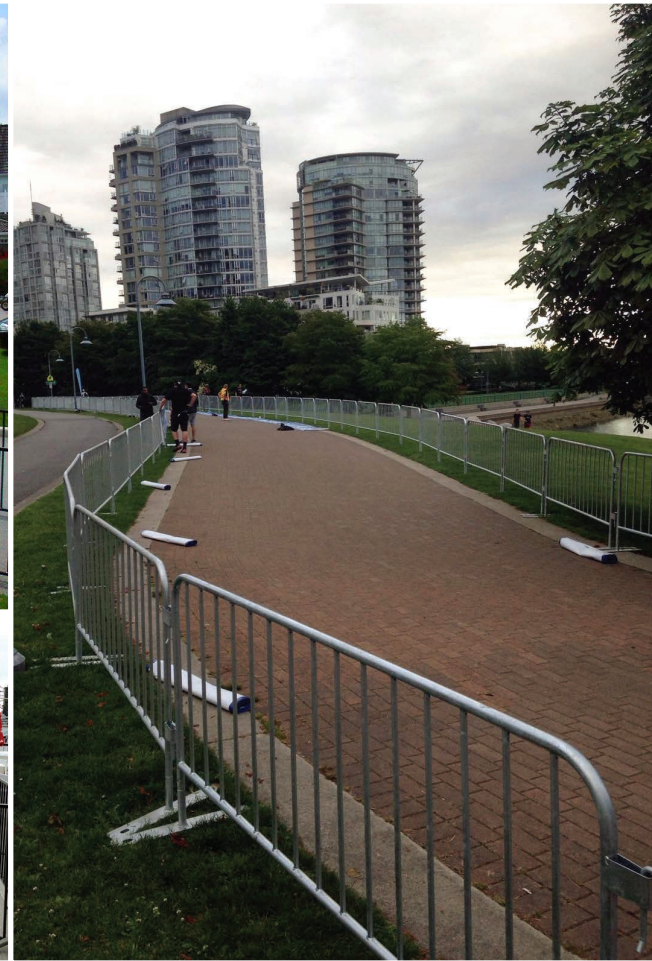

CONTROLLED ACCESS POINTS – multiple gate systems and styles for secure personnel and vehicle access

CROWD CONTROL – high-quality, visually appealing crowd control options available

PRIVACY SCREENING – provides both privacy and security, and can be cut to length without running

CROWD CONTROL FENCING

For event customers who need something a little more special than our standard green fence, Modu-Loc offers a range of high-quality, visually appealing crowd control options.

BLACK VIP FENCE – our premium black fence is an attractive option that is appropriate for the most high-end events. At 40" tall by 8' long, Modu-Loc's black VIP panels are suitable for fencing in beer gardens, creating queues or enclosing exhibits.

SILVER CROWD BARRIER – galvanized steel crowd control barriers are ideal for events requiring an attractive yet effective option for managing pedestrian traffic. Our silver crowd barrier is 42" tall with 5/8" thick vertical pickets.

WHITE PICKET FENCE – a premium option for special events and brand activations. Made of high-quality PVC, our white picket fence offers improved longevity versus traditional wood panels. At 36" tall, it is ideal for securing patios, exhibits or VIP areas.

GATE ASSEMBLIES

Modu-Loc fence systems include pedestrian and vehicle access gates. Our gates can be placed anywhere in the fence line, allowing for effective control of access points.

PERSONNEL AND VEHICLE ACCESS – options include sliding gates, integrated man-door panels, and hinged swing gates

CUSTOMIZABLE SYSTEMS – various widths available

VISIBLE ACCESS – integrated hi-vis gate systems that stand out from the fence line

INCREASE SECURITY – with controlled access points

STAGE BARRICADE

Modu-Loc's stage barricade is ideal for containing large crowds at the outskirts of a stage or any other area to which access must be restricted.

OPTIMUM CROWD CONTROL – heavy-duty step provides elevation for security staff, allowing access to front of crowd for maximum control

ENHANCE EVENT SECURITY by effectively restricting access to controlled areas

WEIGHT – 123 lbs

FENCE SCREENING

Modu-Loc offers fence screening to suit a variety of requirements and applications. All Modu-Loc screening is water repellent, UV resistant, and controls dust and debris. Fence panels must be reinforced when adding screening.

PRIVACY SCREENING – Ideal for special events or any area where limiting visual access or containing dust and debris is required.

- Up to 98% opacity
- Can be cut to length without running
- Black carried in stock; other colours available as special orders

ADVANCED SYSTEMS

Modu-Loc Fence Rentals offers complete systems for specialized applications. As the industry leader in innovative products, we pride ourselves on our ability to stay one step ahead of our customers' needs.

FENCE ON JERSEY BARRIER SYSTEM – for roadside applications or high-security events, Modu-Loc fence panels can be mounted on concrete jersey barriers with saddle mounts or bolted plates, providing additional safety and security. Our award-winning fence on jersey barrier system reduces installation time and costs compared to other mounted barrier systems.

ECHO BARRIER® – for cost-effective noise management. Widely endorsed and certified, Echo Barrier's patented acoustic barriers are suitable for short-term and long-term events requiring noise mitigation.

- **Reduce noise** - achieves reduction between 10 dB and 32 dB
- **Durable** - water-resistant and flame-retardant
- **Proven effective** - recognized by the Noise Abatement Society and the Institute of Acoustics

CONCRETE BLOCK BALLAST SYSTEM – our ballast system prevents the fence panels from being knocked over or lifted off their bases. It is designed to enable our fence to resist strong winds and is our most popular solution for reinforcing fence that is to be used for banners or screening.

SAFETY PRODUCTS

Modu-Loc offers a wide range of quality safety products to provide greater protection for event staff, attendees and the public. All available for rent or purchase.

SAFETY RAMPS – slide onto fence bases to provide a smooth transition for wheeled equipment, and to help reduce pedestrian tripping hazards.

DELINEATORS – 42" - 45" tall and available in a variety of styles with different handles. Loopers and T-tops come with a weighted black base.

DELINEATOR BOOTS – all of our delineators can be outfitted with a metal boot and attached to Modu-Loc fence bases, further reducing tripping hazards, preventing theft and improving the barrier between live construction sites and pedestrians.

SECURITY

Modu-Loc Fence Rentals has developed innovative security components and gate systems that work together to form a comprehensive breach deterrent system, creating the most secure temporary fence solution available.

SECURITY CLAMPS cannot be removed without tools and access to the back of the locking mechanism from inside the fence line.

- **Improve security** – as the fence panels cannot be disconnected
- **Increase stability** – with a third connection point for the panels

SECURITY RAILS are a strong visual deterrent, and prove physically challenging to breach.

- **Increase security** – by keeping intruders out of the site

HIGH-SECURITY SYSTEMS - armed with data from rigorous third-party engineering tests, we have developed high-security site containment systems to answer the needs of high-profile events requiring maximum protection and controlled site access.

These high-security systems are categorized into two tiers, depending on the security requirements of the site:

- **Tier 1** - our Tier 1 system is comprised of 8' standard green panels mounted on to concrete jersey barriers. Stability braces, security clamps and security rails are added to improve security and stability of the system.
- **Tier 2** – our Tier 2 system combines our standard green fence panels with security clamps and our concrete block ballast system. Our ballast system is comprised of heavy concrete blocks and wind braces spaced at 20' intervals along the fenceline, and is engineered to withstand high winds.

ENHANCED INSTALLATION

Modu-Loc Fence Rentals offers superior installation systems that adapt to the most demanding conditions – uneven terrain, high winds and roadside applications. Our installers are trained to assess areas of concern and make recommendations for the right accessories to accommodate every site, ensuring optimal support and stability.

ADAPTABLE INSTALLATION using longer caps, triangular bracing, and base extensions to accommodate challenging sites.

- **Achieve perimeter security and stability, even on uneven terrain**

HIGH WIND INSTALLATION including wind braces and ballast system.

- **Reduce costs** associated with damage to fence or property
- **Maintain stability** – required when hanging banners or scrim on fence

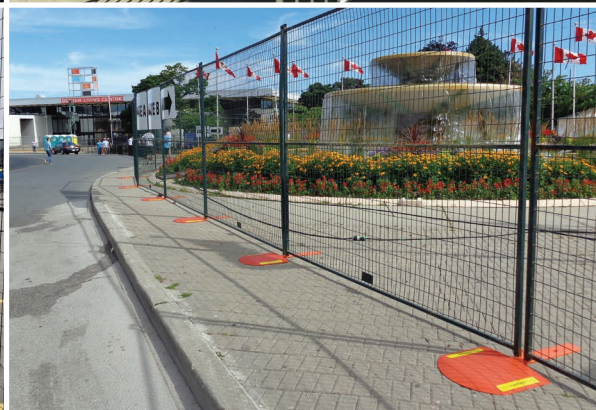

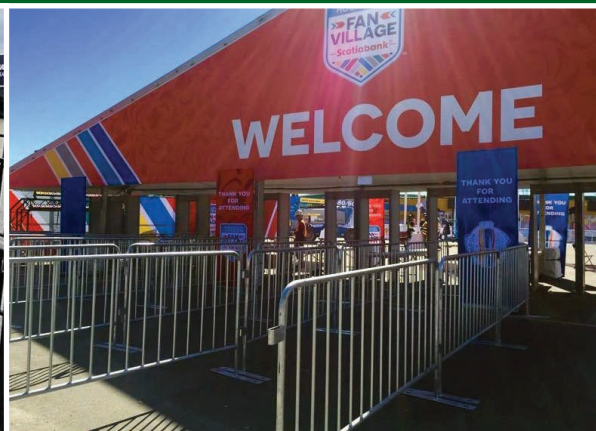

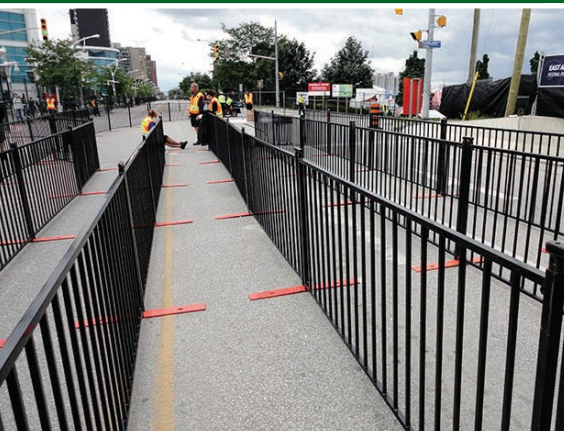

ENHANCED STABILITY with a wide variety of accessories.

- **Spikes** – driven into the ground to secure bases
- **Sand bags** – inexpensive and portable option to improve stability
- **Wind braces** mount to our fence and anchor into the ground at an angle to prevent the fence from tipping or blowing over

Providing industry-leading site containment solutions nationwide
