

# MODU-BARRIER

Modu-Loc's new high-security Modu-Barriers are perfect for short-term projects and smaller installations. Ideal applications include propane compounds, track maintenance, and construction sites or event areas requiring greater security than can be achieved with temporary fence alone. Modu-Barriers are suitable for non-roadside applications only.

**FAST & CONVENIENT** – Arrives fully assembled, reducing total install time

**ECONOMICAL** – For short-term projects, Modu-Barriers are an economical alternative to full-sized concrete barriers

**FLEXIBLE** – Smaller size makes it easy to move barriers on site using a forklift

**SECURITY** – At 9' tall, Modu-Barriers offer a greater visual and physical breach deterrent than concrete barriers or temporary fence alone

**GATES** can be added to a line of Modu-Barriers to create access points without having to move the barrier

For roadside applications and sites requiring privacy screening, debris netting, or Echo Barrier, please consider our engineered fence on jersey system.
